SUBJECT INDEX

PAGE

Computational methods

On the computation of theoretical seismograms for multimode surface waves, *G. Calcagnile, G. F. Panza, F. Schwab and E. G. Kausel* 73
A fast, new computational algorithm for free oscillations and surface waves, *Ralph A. Wiggins*. . . . 135
On the finite difference solution of two-dimensional induction problems, *C. R. Brewitt-Taylor and J. T. Weaver* 375

Data analysis

Source shape estimation and deconvolution of teleseismic bodywaves, *Rob W. Clayton and Ralph A. Wiggins* 151
The *N*-th root process applied to seismic array data, *K. J. Muirhead and Ram Datt* 197
An enhanced deconvolution procedure for retrieving the seismic moment tensor from a sparse network, *Freeman Gilbert and Ray Buland* 251

Deformation and creep

Investigation of crustal deformation following the imposition of a large mass of water, *R. W. Sleigh* 531

Earth's lithosphere

A thermal study of the formation of oceanic crust, *N. J. Kusznir and M. H. P. Bott* 83
Magnetization of the oceanic crust, *C. G. A. Harrison* 257
Electrical resistivity structure beneath the North-west Atlantic Ocean, *K. A. Poehls and R. P. Von Herzen* 331
Crustal structure of the Mid-Atlantic ridge crest at 37° N, *C. M. R. Fowler* 459
Regional vertical tectonics in the Eastern Mediterranean, *J. M. Woodside* 493
Investigation of crustal deformation following the imposition of a large mass of water, *R. W. Sleigh* 531

Earth's mantle

Velocity dispersion due to anelasticity; implications for seismology and mantle composition, *Hsi-Ping Liu, Don L. Anderson and Hiroo Kanamori* 41

PAGE

Elastic wave theory

Correction to 'The effect of anelasticity on periods of the Earth's free oscillations (toroidal modes)', *Hsi-Ping Liu and Charles B. Archambeau* 1
Potentials and displacements for two theoretical seismic sources, *David G. Harkrider* 97
Spectral representation of the Love wave operator, *M. H. Kazi* 225
Moment tensors and other phenomenological descriptions of seismic sources – II. Discontinuous displacements, *George Backus and Marjorie Mulcahy* 301
Matrix methods for generally stratified media, *Georges Jobert* 351
Transformation of multipolar source fields under a change of reference frame, *J. B. Minister* 397
Extension of the Thomson–Haskell method to non-homogeneous spherical layers, *S. N. Bhattacharya* 411
Teleseismic body wave radiation from a seismic source in a layered medium, *Michel Bouchon* 515

Electromagnetic induction

On the finite difference solution of two-dimensional induction problems, *C. R. Brewitt-Taylor and J. T. Weaver* 375

Heat flow

A thermal study of the formation of oceanic crust, *N. J. Kusznir and M. H. P. Bott* 83

Magnetic field, Earth

Observational constraints of the generation process of the Earth's magnetic field, *David Gubbins* 19
Annual variation of the geomagnetic field, *S. R. C. Malin and A. Mete Işikara* 445

Magnetic properties

Magnetic properties of oceanic pillow basalts: evidence from Macquarie Island, *R. F. Butler, S. K. Banerjee and J. H. Stout* 179
A study of rotational remanent magnetization, *R. W. Stephenson* 363

Magneto-telluric methods and surveys

Electrical resistivity structure beneath the North-west Atlantic Ocean, *K. A. Poehls and R. P. Von Herzen* 331

Normal modes of the Earth

Correction to 'The effect of anelasticity on periods of the Earth's free oscillations (toroidal modes)', *Hsi-Ping Lui and Charles B. Archambeau* 1
A fast, new computational algorithm for free oscillations and surface waves, *Ralph A. Wiggins* 135

Palaeomagnetism

Magnetic properties of oceanic pillow basalts: evidence from Macquarie Island, *R. F. Butler, S. K. Banerjee and J. H. Stout* 179
Magnetization of the oceanic crust, *C. G. A. Harrison* 257
The non-uniqueness of the Australian Mesozoic palaeomagnetic pole position, *P. W. Schmidt* 285
A study of rotational remanent magnetization, *R. W. Stephenson* 363

Seismic methods and surveys

Generalized $p-\Delta$ curves, *George A. McMechan* 9
Inversion of seismic travel times using the Tau method, *A. C. Bates and E. R. Kanasewich* 59

Seismology

Generalized $p-\Delta$ curves, *George A. McMechan* 9
Velocity dispersion due to anelasticity; implications for seismology and mantle composition, *Hsi-Ping Liu, Don L. Anderson and Hiroo Kanamori* 41
Inversion of seismic travel times using the Tau method, *A. C. Bates and E. R. Kanasewich* 59
